1. 3D DOUBLE ISO NPG GELCOAT layer offers an excellent protection of the color against the chemical agents and high UV resistance ($0.8 - 1 \text{ kg/m}^2$)
2. Antiosmosis layer acting as a chemical barrier made of vinylester resin reinforced with fiberglass mat (1 mm thickness)
3. Successive layers of orthophthalic resin reinforced with glass fiber mat (2 mm thickness)
4. Ceramic structure improves the mechanical characteristics and increases the fatigue life (4 mm thickness)
5. Successive layers of orthophthalic resin reinforced with glass fiber mat (2 mm thickness)
6. Top coat for the protection against external factors - moisture (0.3 kg/m^2)

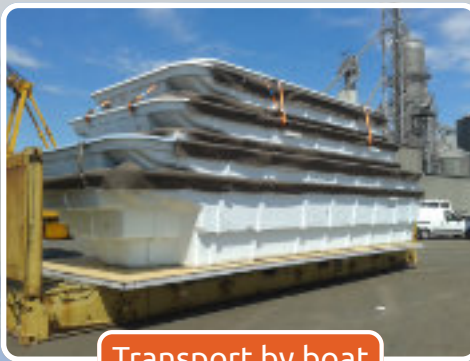

1. Double layer 3D vinylester gelcoat-UV and chemically resistant ($0.8 - 1 \text{ kg/m}^2$)
2. Antiosmosis layer with vinylester resin reinforced with fiberglass mat (1 mm thickness)
3. Successive layers of orthophthalic resin reinforced with fiberglass mat (2 mm thickness)
